Postdoctoral Position in Early Intervention at Northwestern University

The Northwestern Early Intervention Research Group (EIRG) is accepting applications for a Post-Doctoral position focused on research in early intervention with a focus on children with autism.

Requirements include:
(1) a PhD in Communication Sciences and Disorders, Psychology, Linguistics, Neuroscience, Cognitive Science, or a related field;
(2) experience conducting research with young children with developmental delays;
(3) strong writing skills;
(4) solid quantitative skills (multivariate statistics);
(5) ability to think critically and broadly;
(6) ability to work well both independently and with others.

Preference will be given to candidates who have experience with (one or more, specify which):
(1) ASHA CCCs
(2) early intervention therapy
(3) assessments and diagnostics
(4) behavioral coding
(5) publishing in peer-reviewed journals.

Northwestern University is located in Evanston, IL, within the Chicago metropolitan area, and offers world-class urban, suburban, and rural living possibilities within a close radius for individuals of diverse backgrounds and interests. Salary is competitive and consistent with NIH guidelines.

To apply, candidates should email a curriculum vitae, a one-page research statement, two sample publications, and the contact information of three referees to Dr. Megan Roberts (megan.y.roberts@northwestern.edu). Finalists will be asked to submit three letters of recommendation.

Review of applications will start on April 30, 2017 and will continue until the position is filled. Start date negotiable between June and August 2017.

Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes including veterans and individuals with disabilities. Women and minorities are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.
